AT&T to Offer Webalo's Mobile Dashboard Service to Retail Sector

By [Anil Sharma](#)
 TMCnet Contributing Editor

AT&T ([News - Alert](#)) plans to offer Webalo's unique Mobile Dashboard service to the retail sector.

Sangoma A400 FXO/FXS
 The Industry's Most Advanced Analog Telephony System.
 Now with SoftEcho™ Echo Cancellation.

powered by
SANGOMA

Webalo technology transforms enterprise applications and data to make them compatible with mobile devices.

This eliminates the need for traditional custom programming, reducing the

deployment of mobile applications from weeks or months to, in most cases, less than a day.

The resulting "anywhere, any time, on-demand" availability of enterprise data on handheld devices turns such devices into viable alternatives to desktop, laptop, and palmtop computer hardware, and lets mobile employees work more productively – on the spot – to solve problems, answer questions, monitor operations, close sales, and make informed decisions.

The Webalo ([News - Alert](#)) Mobile Dashboard Service – available in both

Internet-based and enterprise intranet-based implementations – lets non-IT business administrators securely specify the content of mobile-accessible information, and the companion Webalo Proxy Server  configures it, in seconds, to conform to the native user interface of any BlackBerry ([News - Alert](#)), Windows Mobile, PocketPC, Palm, Symbian, or Java-enabled smartphone.

Webalo's technology transforms the role of Service Oriented Architecture (SOA) into a User Oriented Architecture, enabling Web services to communicate with users as effectively as they communicate with other system services.

Software vendors and system integrators such as Actuate, IBM ([News - Alert](#)), Nokia, and RIM are working with Webalo to enhance both their service oriented business applications and their mobile devices.

"Retail is a real-time business – where knowing the status of sales figures and inventories on a moment-to-moment basis can mean the difference between profit and loss," Peter Price, president and CEO of Webalo said.

"Our Mobile Dashboard Service puts such information right into the hands – or smart phones – of retailers in the field or on the floor. With AT&T's support and promotion of the service to retail, we are looking forward to a positive response, and a healthy adoption rate."

Price said that there are a large number of ways in which retail professionals can use the Mobile Dashboard on their mobile devices.

Webalo also recently announced that the service is now available on an in-house server "appliance" that is valuable to large corporations, including retail chains, that prefer to install the Mobile Dashboard inside their own data centers.
