Webalo Dashboard to be available on AT&T!

<http://www.intomobile.com/2008/03/17/webalo-dashboard-to-be-available-on-att.htm...>

AT&T is planning to offer Webalo's Mobile Dashboard service to the retail sector - enabling the delivery of real-time business intelligence to a mobile workforce in a market that is all about "real-time". As you might or might not know, Webalo's technology transforms enterprise applications and data to make them compatible with mobile devices, eliminating the need for traditional custom programming and reducing the deployment of mobile applications from weeks or months to, in most cases, less than a day.
