

Mobilize Salesforce reports using Webalo and Conga Courier.

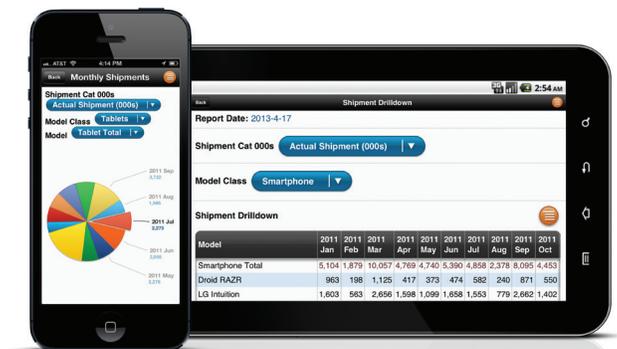

Send any Salesforce report to anyone, anytime on their smartphone and tablet

Webalo® optimizes Salesforce® reports and transforms them into mobile friendly versions. Instead of panning and scanning through reports designed for viewing on desktops and laptops, you get reports that are easy to navigate and read on Android, Apple, BlackBerry, and Windows smartphones and tablets.

Conga Courier® made its reputation by providing a simple process for automating the delivery of Salesforce reports to anyone inside or outside your organization:

- Define the schedule
- Deliver to the recipients

Automated Salesforce report mobilization is now possible, when you combine Webalo and Conga Courier. Simply identify the mobile end users through the Webalo account and utilize the Conga Courier schedule. This process also allows all contacts within an account to receive reports on their mobile devices, not just your Salesforce users.

Conga™ courier®

Enterprise Mobility Made Easy and Profitable: Webalo and Conga make profiting from enterprise mobility as simple as 1-2-3.

STEP 1: Set Up

Set up your 30-day free trial of Conga Courier in your Salesforce instance (available through the Salesforce AppExchange) and create your free Webalo account: <http://www.webalo.com/conga/>

STEP 2: Configure

Configure your Webalo report using your desired Salesforce report spreadsheet (CSV format). Use Webalo to deploy the report to your selected recipients.

STEP 3: Activate

Create and activate the Conga Courier schedule in Salesforce for your newly deployed report. Automatic email updates to Webalo will now run according to the schedule.
