Webalo is the easy, fast alternative to traditional mobile application development – an affordably scalable and integral part of the IT enterprise mobility infrastructure that, out-of-the-box, seamlessly integrates and interoperates with enterprise applications and data, Enterprise Mobility Management platforms, and Android, Apple, BlackBerry, and Windows mobile devices. Its infrastructure-level implementation lets it automatically generate and deploy secure enterprise-to-mobile apps in minutes, eliminating the obstacles to BYOD. It's 100x faster than traditional mobile application development, reduces the burden on IT, lowers overhead, extends the value of enterprise applications, and leverages the full computing power of smartphones and tablets.

Whether your organization relies on enterprise applications from IBM, Microsoft, Oracle, SAP, Salesforce.com, other vendors, or custom-built in-house applications, Webalo provides mobile access to these applications individually or combines functionality and information from multiple applications to give mobile users access to the exact data and functions they need to whiz through tasks and workflows more productively.

Enabled with Citrix MDX App Container Technology

Webalo for Citrix Worx is specifically designed to plug into the Citrix XenMobile mobility platform, ensuring that all data on company-furnished or bring-your-own devices are secured by Citrix MDX technology. Webalo for Citrix Worx is Citrix Ready Worx Enabled and has been verified to work "out-of-the-box" with Citrix MDX security, delivering apps for Android and iOS smartphones & tablets.

Secured by XenMobile and Worx Home

Webalo for Citrix Worx requires the use of a XenMobile Admin console account (for managing mobile apps) and requires that Worx Home be installed on the mobile device. With XenMobile Admin console, organizations can centrally manage and deploy Webalo for Citrix Worx for their users with the confidence that their corporate data is secure. Webalo for Citrix Worx leverages the Citrix MDX policy framework that provides authorization, configuration, and data security capabilities while preserving Webalo's functionality and user experience.

Verified by Citrix

Webalo has integrated with Citrix Worx at the code level, completing a series of tests established by Citrix, and can be trusted to work effectively with Citrix XenMobile. Webalo has met all of Citrix's secure coding, security testing, and basic security requirements, providing a high level of assurance to IT security management about the effectiveness of Webalo's security infrastructure.

The Webalo for Citrix Worx client is available from Apple's App Store, Google Play, and the Citrix Worx App Gallery.

The Webalo for Citrix Worx client requires a Webalo administrator account, which can be obtained at www.webalo.com/citrix.

In Cloud or On-Premise

Webalo is available as a cloud-based service or a behind-the-firewall virtual appliance that runs on the leading virtualization platforms (hypervisors). The platforms include Xen®, VMware®, and Microsoft Windows Server® 2008 Hyper-V™.

Additional information about Webalo's products, customers, and partners is available at www.webalo.com.

Citrix Worx Home App

Webalo authenticates to the Citrix Worx and other Citrix Ready Worx Enabled secure applications with the Worx Home app installed on your iOS or Android device.
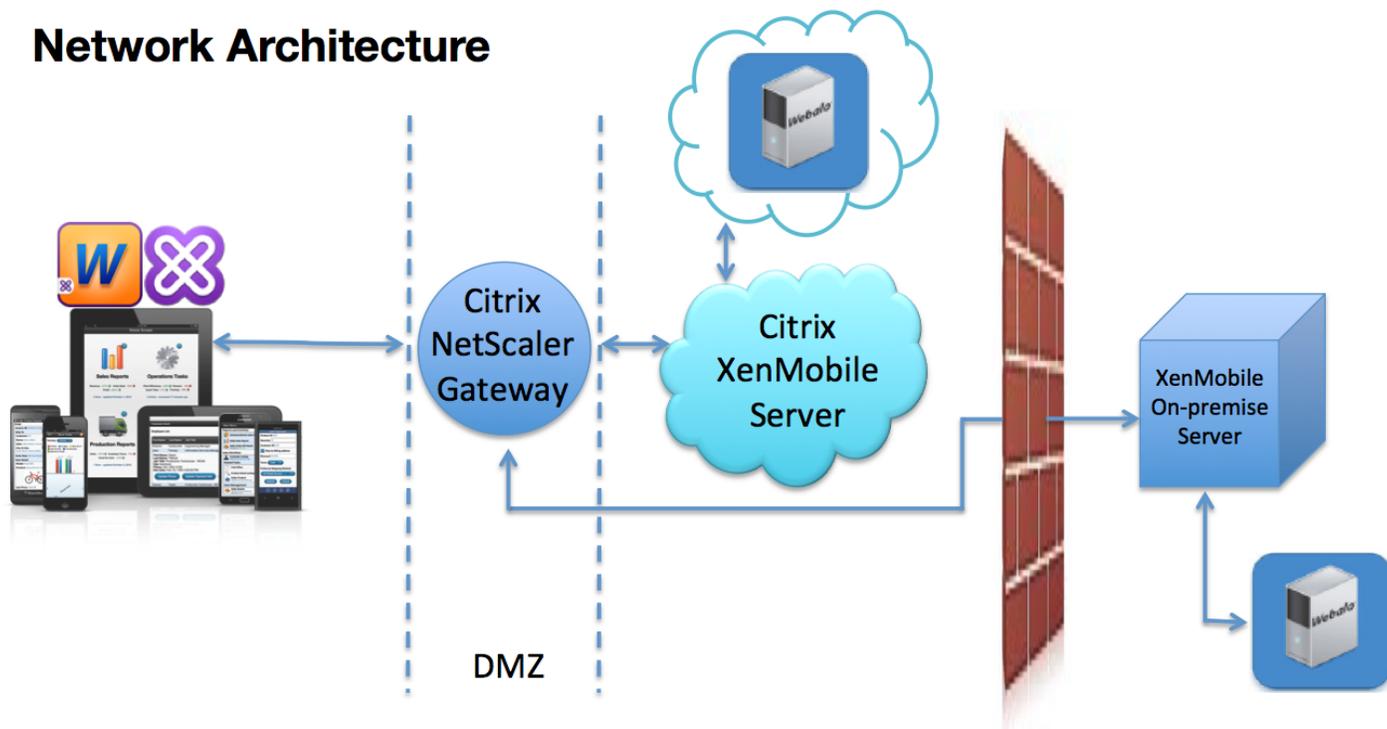

Enterprise Apps in Minutes

Citrix customers will be able to quickly benefit from Webalo's step-by-step, point-and-click, configuration platform to create and deploy mobile apps in minutes while using XenMobile to manage apps, devices, and content on both iOS and Android smartphones and tablets.

Deployment

Simple to deploy and even easier to use, Webalo can be up and running in minutes with no consultants required. Webalo's self-service infrastructure provides deployment options either in the cloud or on-premises.

Network Architecture

FEATURES OF THE JOINT SOLUTION	RELATED BENEFITS
Easy, fast mobile app creation and deployment	Citrix customers will be able to benefit from Webalo's step-by-step, point-and-click, cloud-based configuration platform to create and deploy mobile apps in minutes.
Cloud & appliance deployment options	Allows deployment flexibility depending on customer needs and requirements.
Bi-directional data access	Two-way mobile communication. Access data from, and/or write back to, enterprise applications.
Cross platform deployment with built-in enterprise data access	Deploy apps to any mobile device supported by Citrix Worx. Webalo automatically generates a native user experience on multiple devices. Built-in connectors for interaction with enterprise spreadsheet reports, databases, XML web services, and websites.
Authentication	Two-way secure authentication through Citrix and Webalo. Single sign-on can be delegated for Citrix Worx applications
Security	Ensures security of enterprise data by leveraging Citrix's security architecture to deliver on-device application security, encryption and control.
Policy Management	Controlled access to all mobile apps, including Webalo for Citrix Worx.
