Download Webalo for Good

Webalo for Good is available from the Apple App Store and from Google Play.

Webalo for Good

Webalo is enterprise mobility the way it's meant to be – easy, fast, and affordable. Webalo can be configured in minutes to deliver secure, interactive, bi-directional, transactional mobile access to the enterprise applications, data, and real-time operational intelligence employees rely on to do their jobs. It's 100x faster than traditional mobile application development, a fraction of the cost, simple enough for anyone to master, and powerful enough to let users take action directly from their smartphones and tablets. Webalo reduces the burden on IT, lowers overhead (by eliminating development software, coding, consultants, and technologies for managing and distributing mobile apps), extends the value of enterprise applications, and leverages the full computing power of smartphones and tablets.

Webalo for Good is specifically designed to plug into the Good Dynamics secure mobility platform and is integrated with the Good Dynamics container, ensuring that all data on company-furnished or bring-your-own devices are secured by Good's technology. Webalo's step-by-step, point-and-click, cloud-based configuration platform creates and deploys mobile apps in minutes while using Webalo for Good to access those mobile apps on both iOS and Android smartphones and tablets.

Whether your organization relies on enterprise applications from IBM, Microsoft, Oracle, SAP, Salesforce.com, other vendors, or custom-built, in-house applications, Webalo provides mobile access to these applications individually, or combines functionality and information from multiple applications, to give mobile users access to the exact data and functions they need to whiz through tasks and workflows more productively.

Secured by Good Dynamics® and the Good™ NOC

Webalo is integrated with the Good Dynamics platform and Good™ NOC, allowing IT and line-of-business staff to scale their enterprise application deployment initiatives, confident about on-device app security and the ability to control the data being presented to users.

Webalo for Good conforms to Good's Data Leakage Policy (DLP), enabling administrators to prevent users from copying potentially sensitive data out of the app using copy/paste or open-in, for example, by implementing application policy settings available in the Good Controller. Webalo for Good also works seamlessly with Good for Enterprise. Administrators may delegate authentication to other Good Dynamics-enabled applications to provide a single sign-on capability.

Verified by Good

Webalo has integrated with Good Technology at the code level, completing rigorous testing designed to identify any problems including zero day vulnerabilities and security policy weaknesses. Webalo has met all of Good Technology's secure coding, security testing, and basic security requirements, providing a high level of assurance to IT security management about the effectiveness of Webalo's security infrastructure.

Enterprise Apps in Minutes

Good Dynamics customers will be able to quickly benefit from Webalo's step-by-step, point-and-click, cloud-based configuration platform to create and deploy mobile apps in minutes while using Good Dynamics and Good for Enterprise to manage apps, devices, and content on both iOS and Android smartphones and tablets.

Deployment

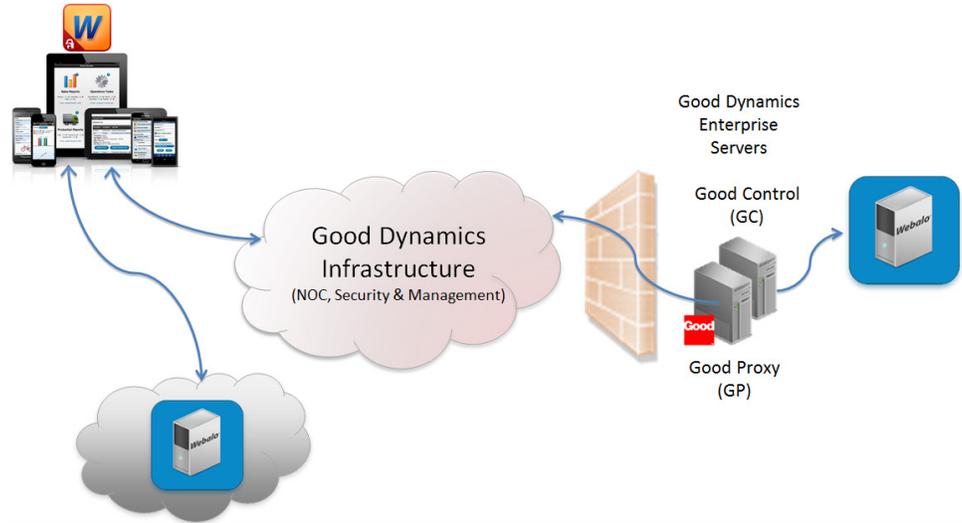

Simple to deploy and even easier to use, Webalo can be up and running in minutes with no consultants required. Webalo's self-service platform provides deployment options either in the cloud or behind-the-firewall.

Network Architecture

Why Webalo for Good?

FEATURES OF THE JOINT SOLUTION	RELATED BENEFITS
Easy, fast mobile app creation and deployment	Good Technology customers will be able to benefit from Webalo's step-by-step, point-and-click, cloud-based configuration platform to create and deploy mobile apps in minutes.
Cloud and Appliance deployment options	Allows deployment flexibility depending on customer needs and requirements.
Bi-directional data access	Two-way mobile communication. Access data and/or write back from enterprise applications.
Cross platform deployment with built-in enterprise data access	Deploy apps to any mobile device supported by Good Dynamics. Webalo automatically generates a native user experience on multiple devices. Built-in connectors for interaction with enterprise spreadsheet reports, databases, XML web services, and websites.
Authentication	Two-way secure authentication through Good Container and Webalo server. Single sign-on can be delegated for Good Technology applications such as Good for Enterprise.
Security	Ensures security of enterprise data by leveraging Good's market-leading security architecture to deliver on-device application security and control—using SSL/AES-256 bit encryption—within the Good Dynamics ecosystem.
Policy Management/Data Loss Protection	Control access to email, copy/paste capabilities, app status, enforce OS version, enforce app version.

Webalo™ *The app for enterprise*™
